

IFIELD MILL

IFIELD WATERMILL SCHOOL SESSION SUMMARIES

How a Mill Works

This session is for the youngest age groups. It offers a simple tour of the Watermill, and explains how it produces flour. The story of The Little Red Hen can be incorporated into this session.

The History of the Mill

This session looks at the history of Ifield Watermill from the iron industry to corn grinding.

Geography and use of water power.

This session focuses on the role of water power, especially in relation to watermills.

Natural History

This session looks at the natural history connected with the mill, including water birds, pond life and flora. Due to deep water and access issues, pond dipping is unfortunately not possible.

Rivers and the Water Cycle

This session focuses on the water cycle, including the role of rivers, with special reference to those in the Ifield area.

Art

The watermill provides a good location for drawing and painting activities.

Mechanics of the Mill

This session looks at how the watermill works.

Bespoke Sessions

Bespoke sessions can be designed on request. Please contact us to discuss your requirements.
